

Model DF100 Control Valve

Technical Sales Bulletin

Patents Pending

Figure 1 *DF100 Control Valve*

The Model Model DF100 control valve is primarily designed for on/off control of a variety of fluids, but may also be adapted for throttle control. These tough, compact valves are ideal for use in oil and gas separators, treaters, scrubbers or as dump valves. The DF100 is well suited for many other high pressure fluid applications up to 2250 Psig (155 Bar). The DF100 Series control valve is available in 1 inch size, either in a globe or tee style valve body with threaded, RF and RTJ end connections.

The Dyna-Flo Model DF100 control valve is manufactured to a high level of quality specifications to ensure superior performance and customer satisfaction.

FEATURES

NACE Service Ready

Standard construction for the DF100 control valve features NACE trim. The valve bonnet and body also conform to NACE MR0175 (National Association of Corrosion Engineers) recommendations.

ASME Class 900

The DF100 is designed and rated for ASME B16.34 Class 150 - 900 service. FNPT connection only available in Class 900.

Live Loaded Packing

Packing for the DF100 control valve is designed to provide a quality stem seal and to prevent the loss of hazardous gases or fluids. The live loaded feature provides for reduced maintenance and positive sealing in temperature and pressure cycling conditions.

Field-Reversible Actuator

Field conversion of the DF100 actuator is designed to be quick and easy. Switch the DF100 from a spring-close to spring-open actuator without any additional parts.

Simple Installation

The DF100 control valves compact design allows for easy installation in tight areas where space is limited.

Easily Maintained

Maintenance is made quick and easy, no special tools required. Valve can be repaired without removing the valve body from the pipe line.

Low Temperature Materials

The DF100 valve and actuator are constructed with materials that are capable of functioning in temperatures of -40°C.

SPECIFICATIONS

Port Diameters

1/4", 3/8", 1/2", 3/4"

Valve Pressure Class / End Connection

- 1" FNPT ASME B16.34 Class 900 (standard)
- ASME 150 - 900 RF or RTJ (options)

Maximum Pressure Drop

2,250 Psig (155 Bar)

Maximum Inlet Temperature and Pressures

2,250 Psig (155 Bar) from -46 to 93°C (-50 to 200°F)
2,185 Psig (155 Bar) at 149°C (300°F)

Standard Shut-off Classification

ANSI Class IV ANSI / FCI 70-2

Dimensions

See Figure 3 & 4

Flow Characteristics

Quick Opening

Flow Direction

Up or Down

- Flow Down recommended for Quick Open application
- Flow Up recommended for Throttling applications

Approximate Weight

20 lb (9 kg)

Maximum Travel

3/8 inch (10 mm)

Material Temperature Capabilities

Body Assembly

-46 to 149°C (-50 to 300°F)

Actuator Assembly

-40 to 82°C (-40 to 180°F)

Body Style

Available in Globe or Tee body style

Bonnet/Body Connection

Threaded

Actuator Configuration

The DF100 utilizes a on/off style spring and diaphragm actuator. Fail closed is field-reversible.

Maximum Actuator Casing Pressure

50 Psig (3.45 Bar)

Effective Actuator Diaphragm Area

33 inches² (213 cm²)

Actuator Pressure Connections

1/4 inch FNPT
